TOURNAMENT RULES

The tournament will be played in accordance with the ISF tournament rules and the ISF rules of the game, as published at <https://isfstratego.kleier.net/rulreg.html>.

Format:

Six rounds will be played using the Swiss system. In case of participation of 8 teams or less, a full competition will follow. Winner of the Cup is the team with the most match points and possibly the most board points.

Match points:

A team gets 2 points for a win and 1 for a draw. The team that loses gets no points.

Board points:

In the four separate games the teams play against each other, the same scoring applies as in a normal Stratego tournament. So the winner gets 6 points, the loser 1 point and in case of a draw both players earn 3 points for the team. Match points can be gained by collecting more board points in a round as a team than your opponent.

Determining final standings:

First, the number of match points collected by each team is considered. In case of equal match points, the 'board balance' = number of board points achieved - number of board points against. If the board balance is also equal, the number of board points in favor is considered.

If even this does not provide a result then the following will be considered:

1. Number of board points achieved by the players on boards 1, 2 and 3
2. Number of board points achieved by the players on boards 1 and 2
3. Number of board points gained by the player on board 1.

Teams:

One team consists of 4 players. The minimum number of players to participate in the tournament is three players. The team is then obliged to occupy the first three boards and take the fourth board as a loss. There are no restrictions on the players in a team.

Playing time:

The total playing time per round is 55 minutes (incl. 5 min set-up time). In principle, all games are played with a Bronstein clock, but on the Stratego Team Cup it is allowed to play without a clock if both players agree.
